Dear Brethren

I am writing to share an urgent need from Brother Jorge Varela. He needs help to repair the timing system of his ministry vehicle. This repair is very important because the vehicle has already reached the recommended mileage for replacing these components. If the repair is delayed, it could result in serious engine damage.

Brother Jorge's vehicle is a 1997 model and has been faithfully serving the ministry for many years. Although it is an older vehicle, it continues to be reliable and remains an important tool for the Lord's work.

The repair includes replacing several critical parts, including the seals, tensioners, springs, bearings, retainers, and the water pump. Since these components work together, the water pump also needs to be replaced at the same time.

This vehicle is essential to the ministry in Zarcero, as it is used every day to meet the many needs of the work there. Because of its daily use, this repair has become urgent to keep the ministry moving forward without interruption.

Brother Jorge is asking for a special offering of \$1,000 to cover both the parts and the labor required for this repair.

We kindly ask you to pray about this need and consider whether the Lord would lead you or your church to help with a special offering. Any gift, whether large or small, would be a tremendous blessing and encouragement to Brother Jorge as he continues faithfully serving the Lord.

Thank you for your love, your prayers, and your faithful support of the ministry. May the Lord richly bless you.
